KEY SKILLS

- HTML5
- CSS3
- JavaScript
- AngularJS
- jQuery
- AngularJS 2
- Grunt
- Github
- RequireJS
- PhoneGap
- Cordova
- Jasmine
- WebSocket
- Google Analytics
- ExpressJS
- NodeJS
- Twitter Bootstrap
- Flairbuilder
- 960 Grid Framework
- Webpack
- D3.js
- LESS
- Photoshop
- Bower
- MongoDB
- Google AMP
- TypeScript

CONTACT ME

PROFFESIONAL ACHIEVEMENTS

- Responsible for redesigning the complete application using Twitter Bootstrap.
- Responsible for evaluating Wire-framing and prototyping tools for project designing and user feedbacks.
- Introduced Better and New Development and Designing tools to improve development productivity
- Successful in convincing the project on use of Dual monitors to increase productivity during development.
- Responsible for introducing new features in knowledge Management system and delivering bug free service packs for Schlumberger Oil Services.
- Leading a team to come up with component based architecture in jQuery, CSS and UI components to reduce development cycle and preserving coding standards.
- Initiated the idea KFSquare aka “Knowledge For Free”, a weekly session to share ideas, technologies, new market trends and best practices among the team members.
- Leading member for Mobile site design (UI and code) and best practice implementations for Knowledge management system (on going).
- Active member of research team for bringing in new ideas and technologies.
- Attended four-day LEAN Workshop conducted by Atos.
- Attended three-day Usability Workshop conducted by “HeadShift”, a Usability Company based in London.
- Attended one-day Agile Scrum Training in Shenzhen China.
- Lead one-day Workshop on IOT in Shenzhen China.

AREA OF EXPERTISE

Web Technology	HTML 5, CSS 3, JavaScript with ES5 & ES6
JavaScript Framework	AngularJS 1, AngularJS 2
JavaScript Library	jQuery
CSS Framework	Twitter Bootstrap
CSS Precompiler	Less, Sass
Task Runner	Grunt, NPM
Dependency Management	Webpack, RequireJS, CommonJS
Unit Test Framework	Jasmine
E2E Test Framework	Protractor
Database	MongoDB
IDE	Eclipse , Sublime, WebStorm
Design Tools	Photoshop, Illustrator, InDesign
Mobile Hybrid App Framework	Ionic, Cordova with PhoneGap
Mobile Web App Framework	Angular Mobile, jQuery Mobile
Chart Framework	D3, HighCharts
Backend Scripting Language	Node with ExpressJS
Web Platforms	AWS, Heroku
JS Design Pattern	Modular, Prototype, Observer, Singleton
OS	Mac, Windows, Linux
Wire framing and Prototyping	FlairBuilder, MockFlow
Architecture	MicroServices, Multi-Tier
Other Tools	Beyond Compare 3.0, Crunch
Others	RESTful Services, OAuth2, JWT, Websocket, Google AMP

EXPERIENCE

Sr. Front-end Developer, HSBC Hong Kong

Oct 2016 – Dec 2016

HSBC Bank is one of the largest banking and financial services organizations in the world. HSBC's international network comprises around 7,500 offices in over 80 countries and territories in Europe, the Asia-Pacific region, the Americas, the Middle East and Africa.

My area of service includes

- Coding in JavaScript, HTML5, CSS3
- Educating other developers on new technology and trends
- Providing Technical Solution to team on UI Front.
- Implementing best practices and coding standards.
- Suggesting Software's and tools to increase Productivity.

Sr. Front-end Developer, Epam Systems <http://www.epam.com/> Shenzhen, China

Jul 2014 – Oct 2016

Epam achieved success through almost two decades of line-by-line hand crafting of complex solutions. From software products to core business applications, Epam has provided expert consulting, development, testing, support and infrastructure services to many of the world's leading organizations. As the world of technology has evolved, so has our distributed delivery model which now includes advanced capabilities in running Agile and Lean engagements in a mix of Onshore/Near Shore and Offshore models.

My area of service includes

- Coding in Angular, Jasmine, HTML5, CSS3 & PhoneGap (Cordova).
- Educating other developers on new technology and trends
- Code review.
- Providing Technical Solution to team on UI Front.
- Designing new modules with latest technology and Usability factors.
- Implementing best practices and coding standards.
- Suggesting Software's and tools to increase Productivity.
- Interacting with clients with regards to the Application requirements.
- Managing teams on technical ground by assigning task as per their capacity and skills

UI Architect, Rishabh Software India Pvt Ltd <http://www.rishabhsoft.com> Vadodara, Gujrat, India

Jan 2014 – Jul 2014

7 Months

Redesigning the complete Application, UI Developer/ UI Designer/UI Architect

January 2012 – January 2014

Schlumberger Oil Services, USA

SCHLUMBERGER is the leading oilfield services provider, trusted to deliver superior results and improved E&P performance for oil and gas companies around the world.

InTouch is a knowledge management system divided into many Segments. Through InTouch all the Schlumberger Employees (80K Approx.) all over the world can connect, share and manage the Knowledge.

Migrate the existing User Interface which is based on a 15 years old UI Concepts to a new web 2.0 UI for the application with Usability in priority. twitter bootstrap framework was evaluated and chosen as the UI Framework and jQuery as JavaScript Framework.

Team Size: 15+

Skill Used: Wire framing and prototyping, Work breakdown structure, Architecture design, Setting coding standards, Bringing in New web2.0 patterns, Usability study, Performance tuning, Performance testing, Code review, Evaluating new technologies and tools, Coldfusion 8, Twitter Bootstrap 2.0.4, jQuery 1.7.1, CSS3, HTML5 Basic, LESS Framework, Flair Builder, Photoshop, Dreamweaver

jQuery Intouch Framework, UI Developer

January 2010 – March 2010

Schlumberger Oil Services, USA

Enhancing decade old application into more web2.0 architecture seems tedious without a project architecture in place. The application was loaded with multiple js frameworks and became hard to maintain. The proposal was to create a framework which will act as an interface to all plugins and

features the developers will use and thus enabling a common coding practice and easy migration in future. The framework was designed keeping in mind the future possibility of upgrading the feature/plugin without impacting the main application code. The plug and play feature enabled the framework to replace a plugin and inject another other with ease.

Team Size: 1

Skill Used: jQuery 1.4.2, jQuery Plugins, JavaScript

ejMobile, UI Developer

December 2011 – May 2012

Schlumberger Oil Services, USA

Mobile version of eJourney Application built for smart phones and tablets. Touch Based interface using Sencha Touch framework.

eJourney is a web based journey management tool used to effectively manage field journeys. It is a Schlumberger tool designed to improve driving performance as measured by Automotive Accident Rate CMS and CMSL and standardized process of creating a trip, monitoring the ongoing journey and finally closing the journey. Standardize the journey risk assessment process. Ensure the driver has all the required certifications for the assigned vehicle and the necessary skills and vehicle endorsements. It is used to log, track and approve all journeys outside city premises as per location boundaries. Allow journey plan to be entered electronically. Provide online review of pre-journey risk assessment/accountability. Automatic alerts and ability to monitor the journey through Journey Management Center (JMC).

Team Size: 5

Skill Used: Documentation, Work breakdown structure, HTML 5, CSS 3, Sencha Architect, FlairBuilder, Sencha Touch, Ext.js, Sencha Architect

NFind Search for Mobile devices, UI Developer/UI Architect

January 2011 – August 2011

Schlumberger Oil Services, USA

SCHLUMBERGER is the leading oilfield services provider, trusted to deliver superior results and improved E&P performance for oil and gas companies around the world.

InTouch is a knowledge management system divided into many Segments. Through InTouch all the Schlumberger Employees (80K Approx.) all over the world can connect, share and manage the Knowledge.

Mobile version of inTouchsupport.com built for smart phones and tablets. Touch Based interface using jQuery Mobile framework.

Team Size: 3

Skill Used: ColdFusion 8, Oracle9i, jQuery Mobile Framework alpha 2, jQuery, JSON, HTML5, CSS, iPhone simulator

Finance Portal, UI Developer/ UI Designer

May 2011 – Aug 2011

Schlumberger Oil Services, USA

A finance portal is a web site that brings information from diverse sources in a unified way. Usually,

each information source gets its dedicated area on the page for displaying information. Based on the user subscriptions the information will be displayed to the user.

This is Knowledge Management Application. I have created a user interface using SharePoint Designer, HTML5 and CSS3. I have used FlairBuilder for convert client requirements into wireframes.

Team Size: 1

Skill Used: SharePoint Designer, HTML, CSS 3, FlairBuilder

kPod, UI Developer/ UI Designer

January 2010 – December 2010

Schlumberger Oil Services, USA

SCHLUMBERGER is the leading oilfield services provider, trusted to deliver superior results and improved E&P performance for oil and gas companies around the world.

InTouch is a knowledge management system divided into many Segments. Through InTouch all the Schlumberger Employees (80K Approx.) all over the world can connect, share and manage the Knowledge.
